Overview
Car Mount Assembly Parts

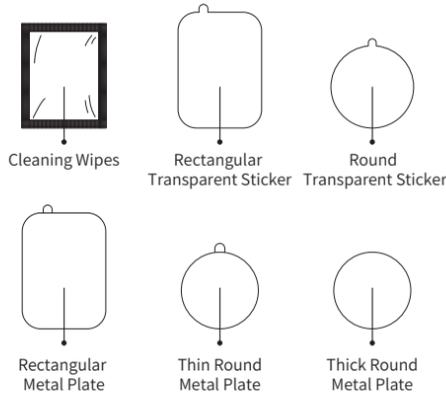

Attention:
To protect your air vent blade, please adjust the air vent clip properly and do not use the air vent clip too tight.

The Suitability of Car Air Vent

horizontal and vertical 	Support
non-intensive, circular or special-shaped 	Nonsupport

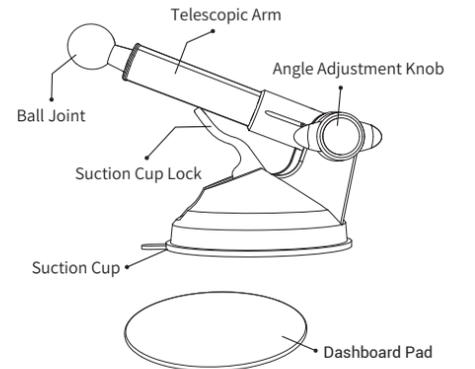

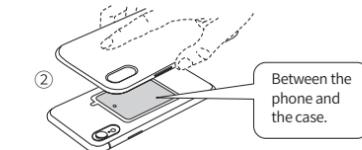

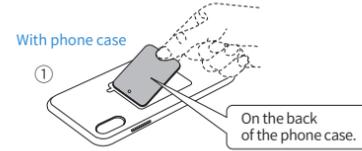

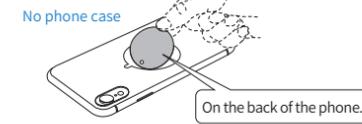

Mobile Phone Accessories Package

Attention:

- Please stick the metal plate on the phone case with flat and smooth surface, please do not stick the metal plate on the phone with uneven case (such as frosted phone case).
- For a very thick phone case (such as lifeproof, defender and otterbox case), please stick the metal plate on the outside of the case.
- The metal plate is one-time use, not reusable.
- For phones that need wireless charging, please do not stick the metal plates on the phones directly. We suggest that please stick the metal plate on the phone case, when you need to use wireless charging function, just remove the phone case.

Clean the surface with the cleaning wipes. Then stick the metal plate above the transparent sticker on the phone/case.

Tips for Using the Suction Cup

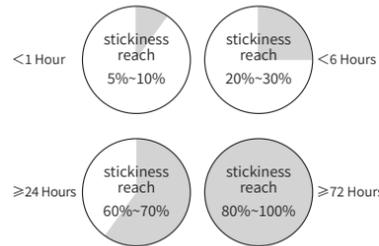

- It will reduce the adsorbability when sticking the suction cup on the curved surface, plush cloth surface or uneven surface.
- It is not recommended to attach the suction cup to leathers, walls or film-coated glass surfaces since the suction cup is designed with strong suction power which may cause surface damage.
- If the suction cup is used frequently in high temperature, low temperature or humid conditions, the adsorption forces would be lower (Please avoid to expose it to the sun for the long time).
- After using for a period of time, if the suction is not sticky enough, please take down the suction cup base and wash it with warm water. It will be sticky again after drying.
- Please guarantee the suction cup is covered by plastic wrap if the suction cup holder is removed.

Tips for Placing the Dashboard Pad

Before installing the mount on uneven or textured dashboard, please firstly stick the dashboard pad on the dashboard (only one-time use). Tear off the red protective sticker on the pad, stick it to the dashboard, press it hard for over 1 minute then let it rest for 1-3 days to have high strong stickiness.

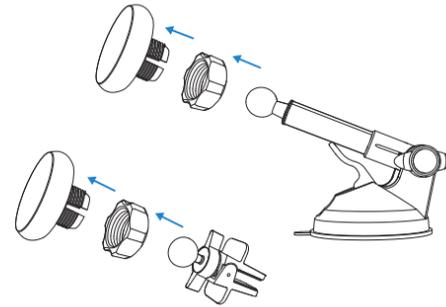

Please wait for 24 hours to use the dashboard pad after stuck it.

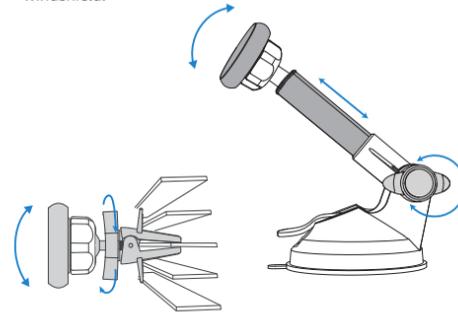

Installation Steps

1. Take out the grip nut on the mount, assemble it with vent clip / suction cup.

2. Find a suitable place in your automobile outlet / dashboard / windshield.

Specifications

Product Name	Magnetic Car Mount
Model	CTEZ54
Applicable Places	Dashboard, Windshield, Table, Air Vent and so on
Package List	Car Mount × 1, Air Vent Clip × 1, Suction Cup × 1, Dashboard Pad × 1, Accessories Package (Cleaning Wipes × 1, Rectangular Metal Plate × 2, Rectangular Transparent Sticker × 2, Round Metal Plate × 2, Round Transparent Sticker × 2) User Manual × 1
