### Overview Mobile Phone Accessories Package

#### Attention:

1. Please stick the metal plate on the phone case with flat and smooth surface, please do not stick the metal plate on the phone with uneven case (such as frosted phone case).
2. For a very thick phone case (such as lifeproof, defender and otterbox case), please stick the metal plate on the outside of the case.
3. The metal plate is one-time use, not reusable.
4. For phones that need wireless charging, please do not stick the metal plates on the phones directly. We suggest that please stick the metal plate on the phone case, when you need to use wireless charging function, just remove the phone case.

Clean the surface with the cleaning wipes. Then stick the metal plate above the transparent sticker on the phone / case.

#### No phone case

#### With phone case

#### Have stronger magnetic power

### Car Mount Assembly Parts

#### Attention:

To protect your air vent blade, please adjust the air vent clip properly and do not use the air vent clip too tight.

### The Suitability of Car Air Vent

horizontal and vertical	Support
non-intensive, circular or special-shaped	Nonsupport

VMPI01002A

### Tips for Placing the Dashboard Pad

Before installing the mount on uneven or textured dashboard, please firstly stick the dashboard pad (only one-time use). Tear off the red protective sticker on the pad, stick it to the dashboard, press it hard for over 1 minute then let it rest for 1-3 days to have high strong stickiness.

After installing the dashboard pad, please wait for 24 hours before using it.

### Tips for Using the Suction Cup

1. Clean the dashboard or windshield where you need to install the car phone mount with alcohol pads or a wet cloth, wait for it to dry.
2. After attaching the suction cup, press down the suction cup lock totally to fix it.
3. It will reduce the adsorbability when sticking the suction cup on the curved surface, plush cloth surface or uneven surface.
4. It is not recommended to attach the suction cup to leathers, walls or film-coated surfaces since the suction cup is designed with strong suction power which may cause surface damage.
5. If the suction cup is used frequently in high temperature, low temperature or humid conditions, the adsorption forces would be lower (Please avoid to expose it to the sun directly).
6. If the suction cup is not sticky enough after usage, please take it down and wash it with warm water. It will be sticky again after drying.
7. Please ensure the suction cup is covered by plastic wrap once removed.

### Tips for Removing the Suction Cup

The suction cup is reusable, it can be removed in the following way:

1. Pull up the lever.
2. Pull the tab on the suction up to allow air to get into it, stick a plastic putty knife and floss (at your own risk) underneath to break the seal.
3. Once the seal is broken you will be able to remove it easier.

### Installation Steps

1. Take out the grip nut, assemble it with suction cup.

2. Find a suitable place, attach the car mount.

### Specifications

Product Name	Magnetic Car Mount
Model	CTVK16
Applicable Places	Dashboard, Windshield, Table, Air Vent and so on.
Package List	Car Mount × 1, Air Vent Clip × 1, Suction Cup × 1, Dashboard Pad × 1, Accessories Package (Cleaning Wipes × 1, Rectangular Metal Plate × 2, Rectangular Transparent Sticker × 2, Round Metal Plate × 2, Round Transparent Sticker × 2) User Manual × 1
